## On the road in China

Our first stop on this China trip is in a province we have been working in since 2007. The group leaders report that the fires of revival began burning with our first visit when we began teaching about the Holy Spirit. The fire has been spreading throughout the province house church network since.

**75 Pastors, leaders and worker have come from near and far to participate in the meetings.** One pastor had traveled 30 hours by train to be here.

By the afternoon of the second day the presence of God began to fall on us in a wonderful way. **25 of the leaders had been baptized in the Spirit the day before and miracles of healing had manifest.** One young worker felt the fire of God come upon his liver. He was instantly healed of Hepatitis B. Another gentleman, who worked as a doctor in a clinic instantly received hearing in his right ear. He had suffered a disease that had left him deaf for 16 years! He also received full use of a debilitated leg. Much to our delight, he rejoiced by kicking his legs in the air.

As many testified, **gold dust began appearing and the leaders began to experience fire come upon them.** Their hands began to burn, healing gifts began manifesting through revelations, waves of power swept through the room. Many of the group were instantly healed of ailments. The testimony went on for hours. I had my hands full just directing traffic; hearing the Spirit direct me, explaining through a translator what was happening, getting the sick to the burning hands, using everything that was happening to train them in spiritual gifts.

Eventually they were all in the flow and I just sat down and watched it all happen. One by one they stood to testify; weeping, laughing, amazed that God had just used them in a spiritual gift and had a miracle happen through them.

Eleven more leaders spoke with tongues. One of the women received a vision as it was all happening. She saw fire in our midst and a multitude of angels watching with interest!

I call this a "good day" In China. Can't hardly wait for tomorrow.
